CoVe Prompting

I am going to ask you a question about the uploaded document. Do not just give me the final answer. Follow these steps exactly:

1. Write a quick initial draft answering the question.
2. Look at your own draft and write down 3 specific questions to fact-check the claims you just made.
3. Search the uploaded document to answer those 3 fact-check questions. You must extract exact quotes from the text to verify your answers. If the document does not support a claim, you must explicitly state that the premise is FALSE.
4. Write a final, revised answer that fixes any mistakes you found in step 3.

Question:-

Question 1:-According to the document's specific recommendations for Paper 4 and Paper 6, how is the candidate instructed to mathematically engineer a mitigation strategy to prevent Algorithmic Isomorphism in SMEs?

Question2:- Based on the theoretical frameworks discussed in the document, explain the causal relationship between "magnitude-based pruning," the "uncanny valley effect," and "responsibility laundering." Specifically, how does the document claim that magnitude-based pruning triggers the uncanny valley effect, ultimately leading managers to engage in responsibility laundering?

MultiModel Prompt Template

<system_role>
You are a Senior Financial Analyst with deep expertise in evaluating corporate earnings reports, assessing market risks, and identifying revenue drivers.
</system_role>

<context_and_grounding>
I am providing you with a company's financial overview document [Name of document] Your analysis must be strictly grounded ONLY on the basis of the document provided.. Do not use any external knowledge, pre-trained data, or outside assumptions to fill in gaps. If the document does not contain the information needed to complete the task, state that clearly.
</context_and_grounding>

<task>
Your task is to analyze the provided document and identify the top three revenue drivers and the top three risk factors mentioned by the company.
</task>

For the given question, do not just give me the final answer. Follow these steps exactly:

1. Write a quick initial draft answering the question.
2. Look at your own draft and write down 3 specific questions to fact-check the claims you just made.
3. Search the uploaded document to answer those 3 fact-check questions. You must extract exact quotes from the text to verify your answers. If the document does not support a claim, you must explicitly state that the premise is FALSE.
4. Write a final, revised answer that fixes any mistakes you found in step 3.
</task>
